LIBRARY
CHICAGO, ILL.
1900

...Announcement...

THIS YEAR finds us better prepared than ever to supply the wants of the public in the ornamental floor line. With a complete factory, improved methods of manufacture, the latest machinery, superior dry-kilns and skilled workmen, we feel ourselves justified in claiming to make and lay parquet floors of superior material and construction at a very moderate cost and invite a critical comparison of our goods, laid or unlaid, with those of the best makers in the United States or Europe.

We are prepared to promptly execute all orders for borders or parquetry, whether catalogued by us or not, having in stock a large assortment of patterns, many of which are not shown on the following pages.

In sending measurements and diagrams of your rooms for estimates, state nature and style of their decoration and we will be pleased to submit special water color sketch of design most appropriate.

However, the most recent designs in the market and the most substantial of previous years are contained in this catalogue. They are displayed in the more expensive prime woods of vermillion and rosewood, although in the greater part of parquetry flooring, mahogany and walnut are employed as the prime woods. Mahogany and walnut offer the same marked contrast to one another as do the vermillion and rosewood, but of a more subdued shade of color.

The prices quoted refer to the 5-16 inch material, laid and finished complete, in Chicago and immediate vicinity, and are subject to a discount where material only is wanted. Prices on border are per lineal foot and on parquetry per square foot.

Prices for $\frac{7}{8}$ -inch material will be quoted on application.

INEXPENSIVE FLOORS.

IT is not necessary, in order to enjoy the advantages of hardwood floors, to buy elaborate and costly designs in inlaid woods. A floor of quarter-sawed red or white oak, in strips $1\frac{3}{4}$ inches wide, laid with an inexpensive border, has all the serviceable qualities of the most artistic designs, and presents at all times a rich and satisfactory appearance. Dimensions and diagrams should be submitted for estimates when possible.

A border made of strips of cherry, oak, maple or walnut in various combinations, known as a strip border, makes a neat finish, and its cost is nominal.
